INFORMATION REQUEST

INFORMATION REQUEST #: IR-005-26

REQUESTED BY: **Councillor Bennett**

TOPIC: **No Traffic Signalization**

DATE OF REQUEST: **October 28, 2026**

DATE OF RESPONSE: October 29, 2026

QUESTION: No Traffic - What is the $326,000 for? Is this a continuation of the existing lights? Or adding new lights? If this is operating costs, why doesn't it continue in 2028? Are we assuming we won't expand the program?

Response

This budget is intended to fund the expansion of the technology to other existing signalized intersections along Century Road, Calahoo Road, and Grove Drive, where warranted through ongoing system review and optimization.

These funds are for capital expansion only and do not include ongoing operating costs. Subscription renewal costs will be accommodated separately within the operating budget every five years, as required.

At this time, no further expansion is anticipated beyond 2027. However, the system will continue to be monitored and optimized, and future expansion needs will be assessed based on operational performance and identified requirements.

Background

The majority of the installation was completed in 2026. The system is currently being optimized. Once Optimization is completed it will be reviewed to see where the expansion would take place or if further expansion is even required.

Financial Implications / Taxation Impact

This project is funded through the Building Canada Strong Fund annual capital grant allocation and has no direct taxation impact. Should it be determined that further expansion of the No Traffic program is not required in 2027, the grant application for this project will be cancelled allowing for that portion of the annual capital grant to be reallocated to future projects in the 2028 budget cycle.
